washable

The clogs made of ALPRO-foam and the replaceable footbed made of cork latex are washable.

## Safe&Clean Clogs – all-round protection for feet and toes

ALPRO Safe&Clean Clogs protect your feet from all sides. The key is not only the hardwearing ALPRO-foam the clogs are moulded out of in a single piece, but also the raised heel protector, which prevents feet from slipping out of the clogs accidentally.

The clogs effectively block out chemicals, oil and grease. Washable at 65°C and easy to disinfect, they can be worn in the food and catering industry

as well as sensitive hygienic areas such as hospitals and laboratories. The removable anatomically formed footbed can be washed at 30°C.

Safe&Clean Clogs are also available with an integrated steel toe cap or as an antistatic version.

# ProTec ESD\*

ProTec ESD sandals and clogs from ALPRO protect sensitive equipment, other people and yourself from painful and dangerous electric shocks.

You can choose between models with shock-absorbing ESD cork-latex footbeds or comfy ESD Soft footbeds. Hard-wearing Birko-Flor or supple leather are available as uppers.

All ESD models fulfill the requirements in the professional ESD sector of  $10^5$  to  $3.4 \times 10^7$  Ohm, according to DIN 61340 – for example for those working with sensitive high-frequency and semiconductor technology.

\* ESD stands for “electrostatic discharge”. You can feel this discharge whenever you’ve charged yourself up electrostatically without noticing – for example through walking on carpets – and then touch metal or another person.

**Anatomical form**  
 provides toes with sufficient space and supports balance and foot health.

**Integrated antistatic**  
 provides permanent soft discharge of electrostatic charge.

**Contoured Footbed**  
 adapts to the shape of your foot with four raised supports.

**Deep heel indentation**  
 keeps your foot safely in the footbed and enhances natural posture.

## Selecting the correct length

is just as important as choosing the proper width.

You should have a few millimeters of space in the heel and toe areas.

On no account should your toes and heel touch the footbed rim.

## ProTec ESD from ALPRO – the best protection at work and play

Walking around for example on carpets, for a longer period, causes an electrostatic charge. If you then shake someone's hand or touch a metal object, there is a brief spark and you get an unpleasant electric shock.

To prevent this, all ESD models from ALPRO return charges evenly to the floor at every step.

All ESD models meet the requirements in the professional ESD sector of  $10^5$  to  $3.4 \times 10^7$  Ohm, according to DIN 61340 – for example for those working with sensitive high-frequency and semiconductor technology.

# Knee protection

Knee protectors and knee cushions from ALPRO – work safely and comfortably.

To make working at ground level as pleasant as possible, we have developed two “helpers” to provide you with perfect support.

ALPRO knee cushions and knee protectors are specially formed to adjust precisely to your knees. The aids softly distribute painful pressure on

certain points of your knees across a larger area. The result: you can relax when working at ground level!

ALPRO knee protectors have been developed in conjunction with the main German group of commercial trade associations.
